This training is rooted in the theoretical basis of Early EMDR Intervention (EEI), and provides instruction on how to create containment and safety, as well as how to implement all eight phases of the EMDR R-TEP. It will teach participants how to navigate safety issues and help clients consolidate or integrate trauma memories using a brief intervention, possibly on successive days. The protocol will be taught using video case illustrations and practical application. Participants must have completed the Basic Training in EMDR to register.

June 10, 2017 (G-TEP training)

Participants will learn a simplified EMDR protocol that can be rapidly taught to use in emergency situations. The workshop presents a new practical application of the Group Traumatic Episode Protocol (EMDR G-TEP). It will be taught using video illustrations and practice. G-TEP has been shown to have beneficial results in controlled studies. Participants must have completed the Basic Training in EMDR. It is recommended that R-TEP training is also completed prior.
